# Malware Analyst (m/f)

### Context:
Innovative company in the area of information technology, itrust consulting implements its missions related to consulting, audit, technical expertise, research and training thanks to a team of 17 young security consultants and IT engineers. itrust consulting is in search of a Malware Analyst in order to strengthen its team of consultants, working in direct contact with the clients.

### Missions:
- Malware analysis;
- Incident response.

### Profile:
- Experience in malware analysis and reverse-engineering (both static and dynamic);
- Knowledge of the internal operation of Windows and Linux operating systems;
- Knowledge of intrusion testing (OWASP Framework...);
- Knowledge and experience in the use of today's virtualisation technologies;
- Knowledge of computer networks as part of corporate incident management;
- Ability to express technical findings and concepts, in a non-technical way, in both written and oral forms;
- Ability to write technical reports in English.

### Tools and technologies:
- Forensic analysis: Volatility Framework, Sleuthkit...
- Reverse engineering: ASM x86/x64, ARM, IDA Pro, OllyDBG, WinDBG, gdb...
- Development in a scripting language: Python, Perl...
